

QA Test Plan - Orangehrmlive.com

1. Project Overview

The purpose of this project is to conduct a structured manual QA assessment of opensource-demo.orangehrmlive.com to simulate a testing cycle prior to release. Testing will focus on functionality, usability, validation, error handling, user permissions, and regression coverage.

2. Scope

In Scope

- User registration
- Login/logout
- Password reset
- User profile
- Dashboard
- Search
- Filtering
- Data entry
- File upload
- Notifications
- Account settings

Out of Scope

- Performance/load testing
 - Security penetration testing
 - Backend infrastructure
 - Source code review
 - Automated testing
-

3. Test Objectives

- Verify core application functionality.
- Identify functional defects.
- Verify expected behavior under invalid inputs.
- Verify error handling.

- Verify user permissions.
 - Verify major workflows from beginning to end.
 - Identify usability issues that could affect users.
 - Determine whether the application is suitable for release.
-

Test Environment

OS: Windows 11

Browser: Chrome

Secondary browsers: Firefox, Edge

Device: Desktop PC

Testing type: Manual

6. Entry / Exit Criteria

Entry criteria

Testing begins when:

- Application is accessible
- Test environment is available
- Core functionality is operational
- Test data is available

Exit criteria

Testing is complete when:

- All planned test cases have been executed
- Critical/high severity defects have been documented
- Regression testing has been completed
- Test results have been summarized
- Release recommendation has been made

QA Release Readiness Report

Executive Summary

Manual QA testing was conducted across the application's core workflows, authentication, data management, validation, permissions, and error handling.

Results

Status	Result
Tests Executed	35
Passed	34
Failed	1
Blockers	0
Bug Identified	1

Defects

Severity	Count
Critical	0
High	1
Medium	0
Low	0

Release Recommendation

As per my testing, I would recommend that the current build of the *Orangehrmlive* website is currently **Ready for release with known issues**.

Based on testing and the presence of only a single bug, I would assess the risk to be minimal and thus recommend the on-time release of this build for the website.
